
Spatial energy flux and computed wave field
(a) Incident channel
(b) Backward channel
y (μm)
x (μm)
Normalized intensity
(c) Coordinate convention
(d) Flux at x = −40 μm
y invariant
k_y
phase ansatz\ $e^{i(k_x x + k_y y - \omega t)}$
k_x
x < 0 plate
Incident
right/up
Backward
left/down
Edge at x = 0
k_y conserved
computed centroid y is about 0 μm
