(a)
reference $n = 33$ excluded; below 10^{-9}: round-off floor
$|\Delta R_B|/R_B$
Galerkin basis degree n
(b)
$|\Delta k_B|/|k_B|$
Galerkin basis degree n
(c)
floor $\sim 10^{-15}$: not a convergence trend
10^{-8} tolerance
10^{-10} tolerance
scaled edge residual
relative energy-balance error
residual magnitude
Galerkin basis degree n
(d)
temporal generator vs complex spatial QEP:
same branch, agreement $\approx 2 \times 10^{-5}$
$|\Delta k|/|k|$
normalised wavenumber $k_x d$
